

Early Childhood Educational Pathways in the University of Hawai'i System
Birth Through 5 Years Programs, Not for Hawai'i Teacher Standards Board (HTSB) License

People on these educational pathways generally pursue careers working with children and families in the birth - PK sector. Graduates of these programs seek careers in family child interactive learning programs, family child care, home visitation, center based preschools and other variations of early learning programs serving children birth to 5 years and their families. They seek employment in settings that are licensed by DHS or license exempt, where an initial teaching license is optional, but not required. They **do not intend to teach in a public school classroom which requires a HTSB initial license.**
